

INSTRUCTIONS FOR ASSESSMENT

Use the following symbols when marking the listening and reading papers:

correct answer: +

incorrect answer: –

no answer: 9

Listening

One letter may be incorrect as long as the meaning of the word does not change. Proper nouns such as placenames should be capitalised. Correct synonyms are allowed. Estonian spelling is not allowed.

1 point for each correct answer. No half-points used!

Task 1

1. by nature
2. design a school/build a school
3. human energy
4. hands
5. change
6. New York
7. possible today / possible (right) now / possible nowadays

Task 2

8. E
9. F
10. C
11. H
12. G

Task 3

13. C
14. B
15. A
16. C
17. B
18. C

Task 4

19. flying things
20. (the) movies / films
21. supermen / superman / superheroes
22. 3000 miles/ 3,000 miles/ three thousand miles
23. quarter / small group / quarter species
24. does not (really/exactly) know / doesn't (really/exactly) know / is not (really/exactly) sure / isn't (really/exactly) sure.
25. poor / bad / horrible / bitter

Reading

All spelling must be correct in this paper! NO points must be given for answers which are not spelt correctly.

1 point for each correct answer. No half-points used!

Task 1

- 26. C
- 27. A
- 28. C
- 29. B
- 30. A
- 31. C

Task 2

- 32. A
- 33. B
- 34. A
- 35. A
- 36. C
- 37. B
- 38. C

Task 3

- 39. B
- 40. E
- 41. B
- 42. E
- 43. A
- 44. C
- 45. B
- 46. D

Task 4

- 47. contributions
- 48. exciting
- 49. buildings
- 50. fully
- 51. addition
- 52. Successful
- 53. fitness
- 54. knowledge
- 55. regularly

**MARKING SCALE FOR WRITING
TASK 1: DESCRIPTION**

	Task Completion	Vocabulary	Grammar
3	All three aspects addressed. Logical and clear organisation.	Vocabulary appropriate to the task. Only a few spelling mistakes.	Grammar well controlled. Only a few grammar mistakes.
2	Two aspects addressed. Organisation not always logical.	Several vocabulary and/or spelling mistakes but conveys the meaning.	Several grammar mistakes but conveys the meaning.
1	One aspect addressed. Illogical organisation. Partly off-topic.	Limited vocabulary. Vocabulary and/or spelling mistakes make communication difficult.	Limited control of grammar. Grammar mistakes make communication difficult.
0	Fewer than 35 words.	Vocabulary and/or spelling mistakes make communication impossible.	Grammar mistakes make communication impossible.
	Ignores the task.		

No paragraphs required.

**MARKING SCALE FOR WRITING****TASK 2: LETTER**

	Task Completion	Organisation	Vocabulary	Grammar
4	All three aspects mentioned and appropriately expanded.	Well organised – can be followed with ease. Clear paragraphs (e.g. appropriate linking devices used). Both salutation and sign-off appropriate and on a separate line. Contains introductory and concluding remarks (e.g. ‘Thank you for your letter ...’, ‘I was happy to hear from you...’, ‘Let me know what you think...’, ‘Hope to hear from you soon...’, etc.).	Vocabulary well controlled and appropriate to the task. Correct spelling and capitalisation. Only a few spelling mistakes allowed.	Grammar well controlled and appropriate to the task. Basic punctuation (e.g. use of period/full stop, question mark, exclamation point, apostrophe) used correctly. Only a few grammar mistakes allowed.
3	All three aspects mentioned but only two appropriately expanded.	Mostly well organised – can generally be followed with ease. Paragraphs not always logical (e.g. lacks appropriate linking devices or uses them mechanically). OR Text written as one paragraph but has logical development. OR Salutation or sign-off inappropriate but on a separate line.	Vocabulary mostly appropriate. May contain several vocabulary, spelling and/or capitalisation mistakes.	Grammar and punctuation mostly controlled. May contain several grammar and/or punctuation mistakes.

		Contains an introductory or a concluding remark but not both.		
2	Two aspects mentioned and both appropriately expanded. Three aspects mentioned but only one appropriately expanded. May include some irrelevant information.	Organisation is evident but may require re-reading. Paragraph(s) sometimes illogical (lacks linking devices). OR Both salutation and sign-off inappropriate or one missing, or not on separate lines. Introductory and concluding remarks inappropriate or missing.	Limited vocabulary. Frequent vocabulary, spelling and/or capitalisation mistakes but conveys the meaning. OR Good vocabulary and spelling but fewer than 60 words.	Limited control of grammar. Frequent grammar and/or punctuation mistakes but conveys the meaning. OR Good grammar and punctuation but fewer than 60 words.
1	One or two aspects mentioned but only one appropriately expanded. One to three aspects mentioned but none expanded. Significant amount of irrelevant information.	Organisation unclear. Relations between ideas unclear. OR Salutation and sign-off missing. Introductory and concluding remarks missing.	Very limited vocabulary. Vocabulary, spelling and/or capitalisation mistakes make communication difficult. OR Fewer than 60 words and contains vocabulary and/or spelling mistakes.	Very limited grammar. Grammar and/or punctuation mistakes make communication difficult. OR Fewer than 60 words and contains grammar and/or punctuation mistakes.
0	Fewer than 55 words. OR Ignores the task.	Not a connected text. OR Ignores the task.	Vocabulary, spelling and capitalisation mistakes make communication impossible. OR Ignores the task. OR Has no vocabulary/spelling/capitalisation mistakes but has	Grammar and punctuation mistakes make communication impossible. OR Ignores the task. OR Has no grammar/punctuation mistakes but has written fewer than 20 words.

			written fewer than 20 words.	
--	--	--	------------------------------	--

Appropriate salutation: Dear Kath/ Hello Kath/ Hi Kath/ Hi!

Appropriate sign-off: Best wishes/ All the best/ Best regards/ Love, etc.+ the student's first name

Not appropriate: Yours faithfully, Yours sincerely.

Tapescript

TASK 1

It was the end of October in the mountains in Austria. I was there on a field trip with my architecture students. And when we reached a high valley, I surprised them with the news that there was no hut or hotel booked for the night. It was not a mistake. It was totally on purpose. The challenge was to build our own shelter with whatever we could find. And we all survived! It was cold, it was really tough ... and it was a great learning experience to discover that there are a lot of resources given by nature for free, and all that we need is our creativity to use them.

I found myself in a similar situation. When I was an architecture student about 13 years ago, I travelled to Bangladesh to a remote village with the aim to design a school as my project.

In terms of suitable building materials for my school, I didn't have to look far. They were right under my feet: mud, earth, dirt, clay, however you call it ... and bamboo that was growing all around. Electricity in remote Bangladesh is rare, but we didn't need it. We had human energy and the people were happy to have the work. Tools were an issue, too, but we had these guys, water buffalos. And except a small team of consultants, it was all built by craftsmen from the village.

The children in the village also helped to build the school. And they loved it! And can you imagine the feeling of a small boy or a girl standing in front of that school building and knowing that you built this out of the ordinary bamboo and just the dirt underneath your feet, using nothing but your hands? That gives such an enormous boost of trust and confidence in yourself and the community.

And in the material. Especially mud has a very poor image. When we think of mud, we think of dirt -- it's ugly, it's nondurable -- and this is the image I want to change. In fact, it's the 11th rainy season for this school now, really harsh rains, and the walls are standing strong.

Approximately three billion people all around the planet are living in earth houses, and it is a traditional building material in Europe just as much as in Africa.

Mud is healthy for the planet, but also for the human bodies. My personal dream is to build a mud skyscraper right in New York.

And this dream isn't so crazy if you think of the mud city of Shibam in Yemen that was built in the 16th century and has lasted now for 500 years. What was possible that long ago is possible today as well.

And I deeply believe our homes, our work spaces, our cities would become more healthy and sustainable and more humane and beautiful.

TASK 2

EXAMPLE 0

My favourite school trip, I guess, I didn't really go on that many, would have to be when I went to Alton Towers, when I went to a large theme park with my school, because it was like a celebration of the end of being at that school, and it was a lot of fun, especially getting to go on all the rides, and it's just a really great day out with friends.

SPEAKER 1

My school didn't have field trips that we would go to, but there were events that we would have. A big event was homecoming, which is the first major sports game of the year, so people would celebrate that a lot and go and see that game, usually football.

SPEAKER 2

My most memorable field trip was the one I never got to go on. We were supposed to go to the museum of natural history to see the different dinosaur bones and mummies, but the bus that we had to drive with broke down. And by the time that we were ready to get to the museum, it was already too late. So, the new bus that came to pick us up, took us back to school.

SPEAKER 3

School field trip? Well, I think once I went to a museum. I don't really understand anything about it, because it was my first time. And we actually went to like a park, which is pretty cool, because I got to hang out with my friends, and yeah, I had a lot of fun.

SPEAKER 4

My very first school field trip I remember was to a park in India. That was when I was in primary school, and this was when I was back in India. I remember we went by bus for about two and a half hours, and then, we ended up in a beautiful park, which was also a graveyard.

SPEAKER 5

My favourite school trip was one where we actually ... when I was living in Colorado, we went to a Nobel prize winner's laboratory, and he demonstrated the experiment that got him the Nobel Prize. And it was really fantastic to be there, to know that I was part of the history of science, as well.

TASK 3

Steven Spielberg once said, "I don't dream at night; I dream all day. I dream for a living." From a young age, Steven showed a strong imagination and a great love for the arts. His family supported him in doing what he loved, which happened to be filmmaking.

Steven's father, Arnold Spielberg, owned a small 8-millimeter movie camera. The family often went on camping trips, which Arnold would record on film. One day, Arnold challenged Steven, suggesting that if he thought he could do better, he should film the trips himself. Handing over the camera to Steven sparked the young boy's interest in filmmaking, and he soon began experimenting with it, marking the beginning of his passion for making movies.

Filmmaking soon became more than just a hobby for Steven. By the age of ten, he was already determined to become a movie director. He would charge admission for his home movies, while his sister Annie sold popcorn to the audience. At 12, Steven completed his first script. At 13, he won first prize in a statewide competition for a 40-minute war movie he had created.

When Steven was about 18, he started trying to break into the film industry. During summer vacation, he took the studio tour at Universal Pictures. He knew he needed to work hard and get advice from professionals to succeed. Steven spent a lot of time at Universal, showing his films to executives.

Since his high school grades were not good enough for film school, Steven attended California State College. Despite his busy schedule, he still visited Universal to talk to executives about his films. Getting noticed in the film industry was the first step in his future career.

TASK 4

Host: This week, we're getting out our bug nets to look at something considerably smaller than us. We're talking about ladybugs, and we're going to be joined by someone we've talked to before on an episode we did about moths.

Kent: I'm Kent McFarland with the Vermont Centre for Eco Studies. I'm a research biologist and I like to study insects and all kinds of other flying things.

Host: Why in the world do you like to study insects, of all the creatures you could study?

Kent: Well, you know, I've studied birds and I've studied mammals, but insects in my world are like everything you can think of that's in the movies, insects do it. They do strange things that we'd never imagined possible. And it just excites me to go out there and find out what they're doing.

Host: Strange things like what? Lift something that would be like us lifting a car or leap tall buildings, that kind of thing?

Kent: Yeah, they're like the supermen of the animal world. They can do all kinds of things that we couldn't dream of: fall out of the sky for hundreds of feet, you know, fly long distances, long distances like 3000, you know, miles, sometimes longer than we never imagined, swim underwater for long periods of time. I mean, you name it, they do it. So can you see... walk...

Host: And walk on the ceilings?

Kent: Yeah. So it's just crazy things they do.

Kent: Well, here's the interesting thing about ladybugs. There's a lot of different kinds of ladybugs. And the ones that we usually think of are the ones that are red with black spots or sometimes little white spots on them. And that represents maybe, you know, a quarter of the species of ladybugs. There's a whole bunch of other ladybugs that are black, brown, red, white, even some kind of other colours mixed in like yellows. And so the traditional thing we think of as the ladybugs are the ones that are black and red. But there's all kinds of others that have all kinds of other patterns and colours associated with them. How do they get their spots? I'm not really sure how they exactly get their spots, but one of the things is the spots are the patterns are probably on them. So that is a warning to other insects or even birds that they might not want to eat them because they might taste poorly. And so it's a way to defend themselves against being eaten by birds or other insects.
